

2024 Conference

Canadian Society for the History of Medicine

19-21 June 2024

McGill University, Montreal

Colloque 2024

La Société canadienne d'histoire de la médecine

19-21 juin 2024

Université McGill, Montréal

AMS

AMS Healthcare is a Canadian charitable organization that recognizes how history and historians can positively shape healthcare. The CSHM is grateful for its ongoing support!

AMS Healthcare est un organisme canadien de bienfaisance qui reconnaît l'apport positif de l'histoire et des historien.e.s sur les soins de santé.

La SCHM est reconnaissante pour son soutien indéfectible !

Shift Work:
The Hospital in Histories of Architecture and Medicine

Anmarie Adams, McGill University

Anmarie Adams, an architectural historian, holds the Stevenson Chair in the History and Philosophy of Science, including Medicine at our host institution, McGill University. The author of prize-winning books and articles, she is a Fellow of the Royal Architectural Institute of Canada, the Canadian Academy of Health Sciences, and the Society of Architectural Historians, and president of CSHM.

Anmarie Adams, historienne de l'architecture, est titulaire de la Chaire Stevenson de philosophie et d'histoire des sciences, y compris la médecine, à notre institution hôte, l'Université McGill. L'autrice d'ouvrages et d'articles primés, elle est membre intronisée de l'Institut royal d'architecture du Canada, de l'Académie canadienne des sciences de la santé et de la Society of Architectural Historians, ainsi que présidente de la SCHM.

12:30 – 14:00 **Lunch Break | Pause du dîner**

LEARNING OBJECTIVES | OBJECTIFS D'APPRENTISSAGE

THIS 2024 CSHM CONFERENCE AIMS TO ENABLE PARTICIPANTS TO:

1. Describe and assess research methods in the history of health and medicine.
2. Demonstrate their knowledge of the history of health and medicine.
3. Discuss and develop a wider critical perspective on the history of health and medicine that can help inform their perspectives on issues related to practice and relevant public debates.

DAY ONE (WEDNESDAY, JUNE 19)

Session Objectives

SESSION 1: A1—ENVIRONMENT | ENVIRONNEMENT

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of the history of health and the environment.
2. Discuss and develop a wider critical perspective on the history of health and the environment that can help inform their perspectives on issues related to practice and relevant public debates.

SESSION 2: A2—PATHOLOGIZED IDENTITIES | IDENTITÉS PATHOLOGISÉES

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of the historical connections of pathologized identities to women and gendered structures.
2. Discuss and develop a wider critical perspective on the historical connections of pathologized identities to women and gendered structures that can help inform their perspectives on issues related to practice and relevant public debates.

SESSION 3: A3—TECHNOLOGY | TECHNOLOGIE

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of the history of health and technology.
2. Discuss and develop a wider critical perspective on the history of health and technology that can help inform their perspectives on issues related to practice and relevant public debates.

PRESIDENTIAL ADDRESS:

SHIFT WORK: THE HOSPITAL IN HISTORIES OF ARCHITECTURE AND MEDICINE

Annamarie Adams (McGill University)

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of the history of the hospital and its relationship with architecture and labour as it relates to shift workers.
2. Discuss and develop a wider critical perspective on the history of the hospital, the importance of architecture, and labour experiences of shift workers.

SESSION 4: B1—PSYCHEDELICS | PSYCHÉDÉLIQUES

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of the history of psychedelics and its relationship to medical practice and patient experiences.
2. Discuss and develop a wider critical perspective on the history of psychedelics that can help inform their perspectives on issues related to practice and relevant public debates.

SESSION 5: B2— MATERIAL CULTURE | CULTURE MATÉRIELLE

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of material culture as a methodology in the history of health and medicine.
2. Discuss and develop a wider critical perspective on material culture as a methodology and its content value in the history of health and medicine that can help inform their perspectives on issues related to practice and relevant public debates.

SESSION 6: B3—BIOGRAPHY AS METHOD | BIOGRAPHIE COMME MÉTHODE

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of biography as a historical methodology and the value of biographical content in the history of health and medicine.
2. Discuss and develop a wider critical perspective on biography as a content tool that can help inform their perspectives on issues related to practice and relevant public debates.

SESSION 7: C1—GRIEF AND RELIEF

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of grief in the history of health and medicine, with its related relief strategies and experiences.
2. Discuss and develop a wider critical perspective on the history of grief in the history of health and medicine that can help inform their perspectives on issues related to practice and relevant public debates.

SESSION 8: C2—CHILDBIRTH | ACCOUCHEMENT

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of the history of childbirth.
2. Discuss and develop a wider critical perspective on the history of childbirth that can help inform their perspectives on issues related to practice and relevant public debates.

SESSION 9: C3—AGENCY IN THE MARGINS | AGENTIVITÉ EN MARGE

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of individual agency, its experiences, and its contentiousness (debates prompted) in the history of health and medicine.
2. Discuss and develop a wider critical perspective on the role of individual agency and its contentiousness in the history of health and medicine that can help inform their perspectives on issues related to practice and relevant public debates.

DAY TWO (THURSDAY, JUNE 20)

Session Objectives

SESSION 10: D1—EDUCATION | ÉDUCATION

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of medical learning experiences and institutional practices in the history of health and medicine.
2. Discuss and develop a wider critical perspective on the history of medical education (and learning practices) that can help inform their perspectives on issues related to practice and relevant public debates.

SESSION 11: D2—INDIGENOUS | AUTOCHTONE

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of indigenous experiences and disease understanding in the history of health and medicine in Canada.
2. Discuss and develop a wider critical perspective on indigenous understanding and experiences in the history of health and medicine that can help inform their perspectives on issues related to practice and relevant public debates.

SESSION 12: D3—PERSONAL NARRATIVES | RÉCITS PERSONNELS

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of the impact of personal narratives in the history of health and medicine.
2. Discuss and develop a wider critical perspective on experiences and personal narratives in the history of health and medicine that can help inform their perspectives on issues related to practice and relevant public debates.

PATERSON LECTURE:

A MEMORY OF MEDICINE: HISTORY AND THE MAKING OF A GLOBAL MEDICAL ARCHIVE

Ahmed Ragab (Johns Hopkins University)

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of specific disease events in the history of health and medicine in the premodern Middle East and the Islamic world.
2. Discuss and develop a wider critical perspective on the history of disease experiences in the premodern Middle East and the Islamic World that can help inform their perspectives on issues related to practice and relevant public debates.

SESSION 13: E1—DISEASE UNDER DEBATE | MALADIE EN DÉBAT

At the end of this session, participants will be able to:

1. Describe and assess disease understanding and specific disease events that gave rise to debate (within and beyond the medical community) in the history of health and medicine.
2. Discuss and develop a wider critical perspective on disease debate in the history of health and medicine that can help inform their perspectives on issues related to practice and relevant public debates.

SESSION 14: E2—DEMOGRAPHY | DÉMOGRAPHIE

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of demographic influences and specific patient population experiences in the history of health and medicine.
2. Discuss and develop a wider critical perspective on specific patient population experiences and the role of demography in the history of health and medicine.

SESSION 15: E3—RECOGNITION | RECONNAISSANCE

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of specific individuals and institutions—typically gone unrecognized—that have played an important role in the history of health and medicine.
2. Discuss and develop a wider critical perspective on the value of recognition and numerous unrecognized contributions in the history of health and medicine that can help inform their perspectives on issues related to practice and relevant public debates.

SESSION 16: F1—SURGERY | CHIRURGIE

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of the history of surgery.
2. Discuss and develop a wider critical perspective on the history of surgery that can help inform their perspectives on issues related to practice and relevant public debates.

SESSION 17: F2—VISUAL CULTURE | CULTURE VISUELLE

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of activism and representation through imagery in the history of health and medicine.
2. Discuss and develop a wider critical perspective on the role played by imagery in activism and presentation in the history of health and medicine that can help inform their perspectives on issues related to practice and relevant public debates.

SESSION 18: F3—ROUNDTABLE: PELVIC HEALTH | SANTÉ PELVIENNE

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of pelvic health in the history of health and medicine.
2. Discuss and develop a wider critical perspective on pelvic health responsibility, individual experiences, and collective activism in the history of health and medicine that can help inform their perspectives on issues related to practice and relevant public debates.

DAY THREE (JUNE 21) | JOUR TROIS (LE 21 JUIN)

Session Objectives

SESSION 19: G1—PAIN | DOULEUR

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of the history of pain in health and medicine.
2. Discuss and develop a wider critical perspective on the history of pain that can help inform their perspectives on issues related to practice and relevant public debates.

SESSION 20: G2—MEDIATION | MÉDIATION

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of mediation (i.e. novel medical procedures and/or individuals as mediators) and its outcome in the history of health and medicine.
2. Discuss and develop a wider critical perspective on the history of mediation as a practice in medicine that can help inform their perspectives on issues related to practice and relevant public debates.

SESSION 21: G3—ISOLATION | ISOLEMENT

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of the role played by isolation (confinement and/or quarantine) as a strategy in disease containment in the history of health and medicine.
2. Discuss and develop a wider critical perspective on the history of isolation practices in medicine that can help inform their perspectives on issues related to practice and relevant public debates.

SESSION 22: H1—EPISTEMOLOGY | ÉPISTÉMOLOGIE

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of the dynamics of epistemology, including consequential influences, in the history of health and medicine.
2. Discuss and develop a wider critical perspective on the history of epistemology in medical practice that can help inform their perspectives on issues related to practice and relevant public debates.

SESSION 23: H2—REHABILITATION | RÉHABILITATION

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of the history of rehabilitation in medical settings and its growth as a medical specialty.
2. Discuss and develop a wider critical perspective on the history of rehabilitation that can help inform their perspectives on issues related to practice and relevant public debates.

SESSION 24: H3—COLONIZATION | COLONISATION

At the end of this session, participants will be able to:

1. Describe and assess research methods and demonstrate their knowledge of the history of medical practice as shaped by colonization frameworks.
2. Discuss and develop a wider critical perspective on the role played by colonization in the history of medical practices that can help inform their perspectives on issues related to practice and relevant public debates.
